

CASE STUDY

Liberty Advisor Group + BlueFletch Enterprise Installer EMM

How Liberty Advisor Group used BlueFletch Enterprise Installer to build out a new dedicated device policy and enroll devices... in less than 24 hours.

OVERVIEW

Liberty Advisor Group is a goal-oriented and results-driven premier consulting firm that develops real-world, situation-specific solutions that work, delivering over \$1 billion in operating income improvement and over 300 M&A deals.

Central to this value proposition is **Liberty's Virtual PPE**, a workplace wellness and risk management platform built to help businesses and their employees return during the COVID-19 pandemic.

The Virtual PPE solution provides proximity alerts, contact tracing, symptoms logs, and a real-time risk management dashboard so that companies can safeguard employee health while mitigating risk to the business.

“ We needed a **simple, quick way to create a dedicated device policy and enroll devices securely**

TRENT FISHER
PRINCIPAL, LIBERTY ADVISOR GROUP

THE CHALLENGE

Liberty Advisor Group needed a way to quickly and confidently get Virtual PPE test devices to their customers for pilot.

Stuck between choosing time-consuming and vulnerable manual processes or costly and complicated EMM solutions, Liberty was looking for a better device management option.

RESULTS

With BlueFletch's EMM, two pilot solutions were configured in hours. The Virtual PPE devices were staged the same day and securely delivered on-site with full remote management.

QUICK

1-day turnaround
to implement and
deploy

SIMPLE
